# Home Page Redesign

## Problem

Users complained that the home page was too cluttered.  I was given 72 hours to clean up the home page and launch a new, cleaner look.

## Solution

Removed the sidebar and the embedded Flickr code. Added a carousel for the icons that link to the mini-sites.  Added a direct link to “Maps,” an area users wanted to get to quickly.  Analytics supported the popularity of the map area.

## BEFORE

## AFTER
